

NetSecure Project Timeline Roadmap

Project Goal

- Build a beginner-friendly cybersecurity project
- Scan networks and detect open ports
- Identify risky or insecure services
- Display scan results on a dashboard
- Create a portfolio-ready project

What is Section 1?

- Section 1 is the foundation of the whole project
- You learn IP addresses and ports
- You learn Python socket programming
- You build your first Port Scanner
- The scanner checks which ports are OPEN

Project Timeline

Section	Topic	Time Required
0	Environment Setup	1-2 Days
1	Networking + Port Scanner	3-4 Days
2	Service Detection	2-3 Days
3	Risk Detection	2-3 Days
4	Flask Backend	3-4 Days
5	Dashboard UI	3-4 Days
6	Integration	2-3 Days
7	Database Integration	3 Days
8	Charts & Visualization	2-3 Days

9	Project Polish + README	2 Days
---	-------------------------	--------

Expected Completion Date

If you consistently work on the project for 30 days starting from **23 May 2026**, the expected date for a fully functional NetSecure project is:

22 June 2026

Final Project Flow
